

Filon Method on $du/dt = \lambda u$ with ansatz $u(t) = f(t)e^{i\omega t}$, $0 \leq t \leq 2.5\pi$

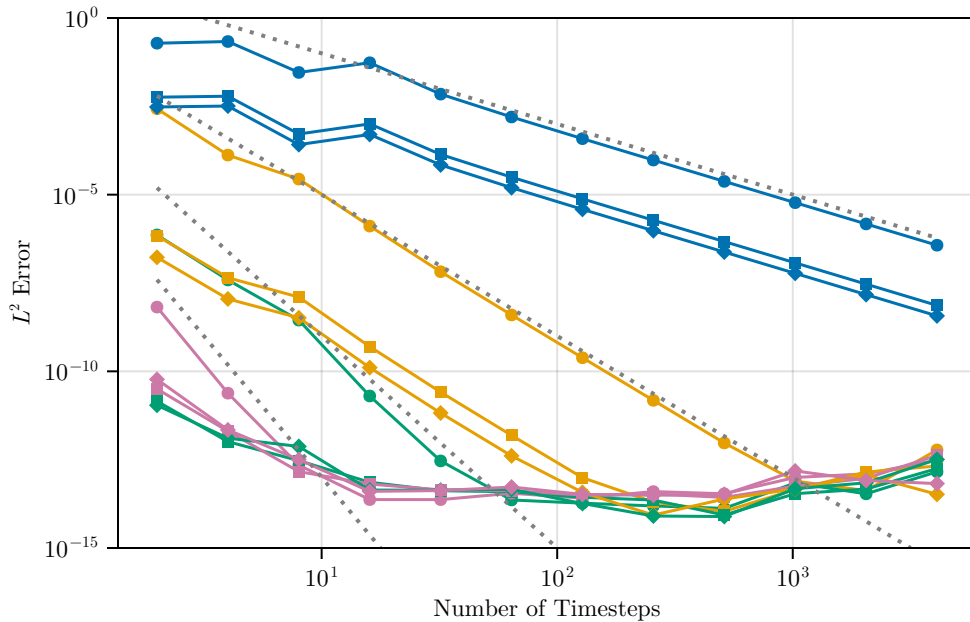

$\lambda = 10i, \quad \omega = 10$

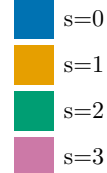

$\lambda = 10i, \quad \omega = 10 + \Delta\omega$

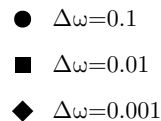

$\lambda = 10i - 0.01, \quad \omega = 10 + \Delta\omega$

Order s

$\Delta\omega$
